

# MSc AUDITING, MANAGEMENT ACCOUNTING AND INFORMATION SYSTEMS

**FINANCE**

**INTAKE: SEPTEMBER  
CAMPUS: PARIS  
LANGUAGE: ENGLISH**

## A unique combination of three inter-connected fields

### Career opportunities

Internal and external auditing, consulting, specialised auditing (IT, marketing), management accounting, industrial management controlling, consolidation management, business accounting, administrative and financial management.

### Programme outline

This programme is designed to help participants develop an in-depth understanding of audit, management control and information systems, and of the different ways they contribute to competitive advantage, wealth and the advancement of society. The MSc provides students with a range of knowledge, tools and skills and the ability to use them in a variety of operational and entrepreneurial situations in order to become responsible managers and contribute to sustainable development. Students develop the ability to think analytically in order to successfully apply their knowledge and technical expertise to the solution of real business problems. The programme supports and encourages students to develop their individual managerial and research capabilities in order to become key actors of change for their companies, profession and the global business environment.

### Why choose this programme

- ▶ Preparation for the main national or international professional certifications in the fields of audit and management control
- ▶ Lectures delivered mainly by international experts
- ▶ Immediate practical application of the knowledge, tools and skills thanks to the educational rhythm alternating one semester of lectures (from September to December), and four months of full internship in a company (from January to April), and then another semester of lectures (from May to July); this rhythm takes into account the specificity of auditing and accounting firms.
- ▶ Links with professional bodies and research, at national and international level (CIMA, IFACI, DFCG, APDC...)
- ▶ International certifications. With a view to gaining the high academic and professional levels this course includes preparation for the main professional certifications and diplomas in the field (the student must choose between the following: CIMA Certificates, "Advanced Diploma in Management Accounting", CISA certificate in information system audit, CIA certificate in internal audit).

### In-company projects and assignments

- ▶ Preparation of management accounts
- ▶ Planning, budgeting, and forecasting management reporting for decision-making
- ▶ Product and service costing
- ▶ Information management
- ▶ Project Appraisal
- ▶ Project Management
- ▶ Working Capital Control
- ▶ The impact of the setting up of a new information system on management control
- ▶ The impact of the setting up of a new decisional data processing on a management control system
- ▶ The optimal organisation of software bricks within an organisation...

*\* The Management Accounting professional specialisation and the International Financial Reporting & Auditing specialisation are offered in English and are specific to the MSc in Paris. However students can also choose a specialisation totally or partially delivered in French (Internal Audit or Information Systems), in this case a good level of French is assumed.*

“This MSc was a great opportunity to study in a multicultural environment.

I have learned so much by interacting with students from different backgrounds. Group work and real case studies have increased my management and leadership skills. We were taught by great professors with strong experience which made the courses very high quality. The teaching model makes the courses very interesting and interactive. The MSc director was always available for students and willing to help and guide us at any moment. The director is motivating, hardworking and inspirational for students. My specialisation in auditing in this MSc has given me the necessary knowledge to start my career at PwC as a junior auditor. „

**Wissam El Hage**  
MSc Auditing, Management  
Accounting & Information Systems

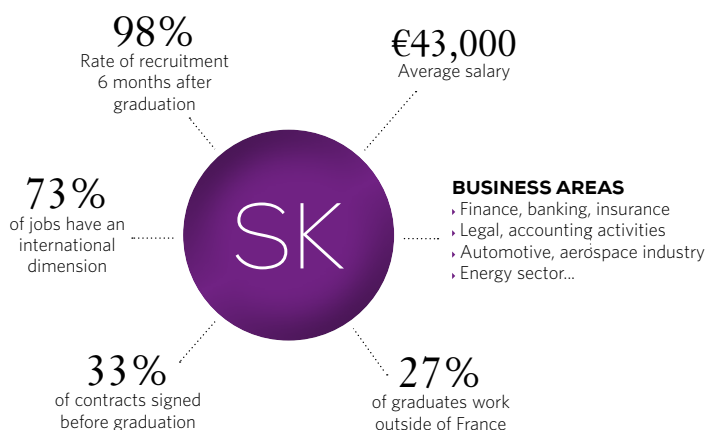

“I’ve enjoyed the MSc Audit, Management Accounting and Information Systems at SKEMA.

The campus in Paris is amazing, and not too big. In this way, it offers close connections between professors and students. It is also very well located in the financial centre of Paris. The courses have been excellent, and students come from everywhere around the world. Communicating with them gives me a new angle to observe and think. Professors are so international and very enthusiastic about helping students. Skema has prepared me for entering the job market. Indeed, I’ve just completed my internship as an accounting assistant in the sports retailing chain Decathlon. „
