### Objectifs pédagogiques du cours :

This course aims at exploring and deciphering the complex topical issues of a region considered as crucial for world security and located at the crossroads of Middle East, Central Asia and South East Asia. Its aim is to highlight the complex interplay between the domestic, regional and international geopolitics of mainly three countries (India, Pakistan, Afghanistan). Students will become familiar with the different ethnic groups, religions and sects of the countries considered. They are especially initiated to the underpinnings of the main conflicts (War on Terror, Kashmir, etc...) with an emphasis on Islamic militancy. The course might also guide them towards research on this area.

### Contenu / descriptif du cours :

After a general introduction on the geopolitics of South Asia, students are initiated to Pakistan, Afghanistan and India one by one, through their history, geography, politics, ethnic and religious diversity and the main conflicts they are involved in. They also are gradually introduced to the complex relations of these three countries with each other, but also with their regional neighbours and to Western powers.
